

FOR CYBER SECURITY OPERATIONS

Speed up your investigations from hours to minutes with link analysis.

INCIDENT RESPONSE

Triage your incidents and identify false positives through preliminary investigations.

CYBER THREAT INTELLIGENCE

Dig into what your targets don't want you to find –Threat landscapes, profiles, TTPs, and where they hide.

RED TEAMING

Research and identify the threat landscape, threat actors, TTPs and system vulnerabilities.

Built to support multiple SOC workflows.

ALL DATA IN ONE INTERFACE

Over 70 integrations with OSINT, threat intelligence, vulnerability scanners, and other data feeds.

Easy data ingestion from SIEMs, logs, ticketing systems, excel tables, you name it.

DYNAMIC DATA VISUALIZATION

Visual mapping, layouts, and node weights to quickly spot hidden data connections and patterns.

Reduce the pain of manual data combing and free up valuable time for intelligence analysis.

BUILT-IN AUTOMATION

Set up automation for standardized workflows with codes so intuitive that your junior analysts can easily master.

One-click report generation and data export for IOC sharing, documentation, and playbook improvement.

From **SIEMs** to **threat intelligence**; from **breach data** to **infrastructure**. All data essential for SOC teams.
