

A DAY IN THE LIFE OF A TRANSFORM DEVELOPER AT MALTEGO

WHAT IS A TRANSFORM DEVELOPER?

Transform Developers at Maltego build the bridge between investigators and data sources. As software developers, they design and develop Transforms and work with the industry to integrate their data into Maltego.

MORNING

- Morning Coffee
- OSINT & Cybersec Reading
- Organize To-Do's of the Day
- Design, Prototyping or Developing

There are **4,150+ Transforms** available in Maltego

WHAT ARE TRANSFORMS?

Transforms are functions that interface public and 3rd party data sources. They take as input data Entities and output related Entities from these data sources, mapping relationships between them.

LUNCH & SOCIAL

- Team Meeting
- Peer Code Review
- Debugging & Bugs

- Research
- Continue Developing
- Technical Writing
